

Jasmine functions

- Suite (describe):
Groups related specs.
- Spec (it):
Groups expectations.
- Expectations (expect):
Test the state of the code.

```
describe('test.js', function() {  
    it('Should be true', () => {  
        expect(true).toBe(true);  
    });  
});
```

Jasmine functions

- Disabled suite (xdescribe):

Any specs inside the disabled suite are skipped.

- Pending spec (xit):

A pending spec does not run, but it will show up in the results as pending.

```
xdescribe('test.js', function() {  
  xit('Should be true', () => {  
    expect(true).toBe(true)  
  });  
});
```
